ABSTRACT

This report compiles basic data on students and educational personnel from a sample of operating local public school systems in the United States. The publication provides pertinent facts to Congress, the Commissioner of Education, Federal agencies, and other educational planners to assist them in making decisions on current educational issues. The data are presented in tables showing national enrollment estimates; quantitative pupil and staff data for the individual school systems included in the survey are also provided. The survey was designed to include all school systems with enrollments of 10,000 or more and a stratified (by enrollment size) sample of systems with fewer than 10,000 pupils. (Author)

## FOREWORD

This third report on pupils and staff of local public school systems, fall 1969, is part of the Elementary-Secondary General Information Survey series (ELSEGIS), a cooperative venture of the U.S. Office of Education's National Center for Educational Statistics (NCES) and the Committee on Educational Data Systems (CEDS) of the Council of Chief State School Officers.

The need to examine local public school systems in their entirety, rather than merely in terms of program elements, precipitated the development of the ELSEGIS survey. This report is intended to provide educators and researchers with reliable and useful data on pupils and staffs of local public school systems.

This report contains tables of national estimates and basic data tables providing quantitative pupil and staff data on the individual school systems included in the survey. These data were obtained from a sample survey of 1621 local public school systems. The survey was designed to include all school systems with enrollments of 10,000 or more, and a stratified sample (by enrollment size) of the systems with fewer than 10,000 pupils. A companion report providing a detailed analysis of these data will be published in the near future.

We wish to express our sincere appreciation to the CEDS representatives, other State agency research and statistical personnel, and local school officials, whose cooperation was essential to the success of this project.

Carol J. Hobson, Chief
Elementary-Secondary
Surveys Branch

BASIC DATA TABLES

1. Number of pupils and classroom teachers, and ratio of pupils to classroom teachers, by organizational level, in selected local public school systems: Fall 1969 . . . . . 14

2. Pupils in membership, by organizational level and grade, in selected local public school systems: Fall 1969 . . . . . 37

3. School system staff, by position, in selected local public school systems: Fall 1969 . . . . . 81

4. Classroom teachers, by highest level of education completed, in selected local public school systems: Fall 1969 . . . . 124

# INTRODUCTION

This report is the third in a series presenting basic data on educational personnel from a representative sample of operating local public school systems in the United States.1/ The primary purpose of this publication is to provide the Congress, the U.S. Commissioner of Education, Federal agencies, and other educational planners with pertinent facts to assist them in making decisions on current educational issues. Many others have found the data useful; among them are the President's Commission on School Finance, the Great Cities Council, the Urban Institute, the Appalachian Regional Commission, educational policymakers, administrators, researchers, and the general educational community that need data which provide them with quantitative information comparable from school system to school system.

This report contains data on pupils and staff as of fall 1969. A companion report on the 1968-69 school-year finances, based on data obtained from the same national sample, is being published separately. Information on individual school systems included in the sample is provided in each of the four basic tables, and summary data are found in the tables of national estimates.

The data presented in this report are derived from the Elementary-Secondary General Information Survey series (ELSEGIS), a cooperative venture of the National Center for Educational Statistics (NCES) and the Committee on Educational Data Systems (CEDS) of the Council of Chief State School Officers. With the cooperative assistance of State and local school officials, a 99-percent response rate was achieved.

To assure maximum comparability, the items and their definitions have been designed to agree wherever possible with the categories and terminology of U.S. Office of Education Handbooks.2/ These standard terminology manuals were developed jointly by the U.S. Office of Education, the State education agencies, educational organizations, and prominent educators, including local school officials.

---

1/ Totals for the United States represent the 50 States and the District of Columbia.

2/ Handbook I - The Common Core of State Educational Information.
Handbook II - Financial Accounting for Local and State School Systems.
Handbook IV - Staff Accounting for Local and State School Systems.
Handbook V - Pupil Accounting for Local and State School Systems.

In the summary tables, the data are divided into:

a. Six enrollment-size groups:

25,000 and more
10,000 - 24,999
5,000 - 9,999
2,500 - 4,999
300 - 2,499
Under 300

b. Three metropolitan-status categories:

Metropolitan, central
Metropolitan, other
Nonmetropolitan

The metropolitan-status categories have been designed to agree as closely as possible with "residence" criteria established by the Bureau of the Census, considering that school system boundaries do not necessarily correspond with city or county boundaries. A school system is defined as metropolitan if it is located in a county defined as a Standard Metropolitan Statistical Area (SMSA) county. (In New England, SMSA's are determined on the basis of towns rather than counties.) If the school system is coterminous with or falls within the boundaries of a central city (the large city comprising the hub of the SMSA), it is classified "metropolitan, central"; if it falls within the SMSA but outside of the central city, it is classified "metropolitan, other." For large county-unit school systems that include both the central city and surrounding areas, a 50-percent rule is applied. For example, if the population of the central city (1960 Census) was 50 percent or more of the county population, the county-unit system is here regarded as "metropolitan, central"; if less than 50 percent, the system is categorized "metropolitan, other." Thus, the Mobile County, Ala., school system is classified "metropolitan, central" because Mobile city made up 54 percent of the total county population; but the Dade County, Fla., system is placed in the "metropolitan, other" category because the central city of Miami accounted for only 31 percent of the total county population.

School systems located outside of SMSA's are classified "nonmetropolitan."

c. Four regions of the United States:

| North Atlantic | Great Lakes and Plains | Southeast | West and Southwest |
|---|---|---|---|
| Connecticut | Illinois | Alabama | Alaska |
| Delaware | Indiana | Arkansas | Arizona |
| District of Columbia | Iowa | Florida | California |
| | Kansas | Georgia | Colorado |
| Maine | Michigan | Kentucky | Hawaii |

| North Atlantic | Great Lakes and Plains | Southeast | West and Southwest | |
|---|---|---|---|---|
| Maryland | Minnesota | Louisiana | Idaho | Utah |
| Massachusetts | Missouri | Mississippi | Montana | Washington |
| New Hampshire | Nebraska | North Carolina | Nevada | Wyoming |
| New Jersey | North Dakota | South Carolina | New Mexico | |
| New York | Ohio | Tennessee | Oklahoma | |
| Pennsylvania | South Dakota | Virginia | Oregon | |
| Rhode Island | Wisconsin | West Virginia | Texas | |
| Vermont | | | | |

For the sake of consistency in tabulation, the summary data are presented to the nearest whole number. Because the data are estimates derived from a sample, they are subject to both sampling and nonsampling errors. As such, they must not be regarded as precise to the last digit. For definitions, see appendix B.

Listed below are the two position State abbreviations adopted by the U.S. Postal Service, and used in the basic data tables.

| State | Abbreviation |
|---|---|
| Alabama | AL |
| Alaska | AK |
| Arizona | AZ |
| Arkansas | AR |
| California | CA |
| Canal Zone | CZ |
| Colorado | CO |
| Connecticut | CT |
| Delaware | DE |
| District of Columbia | DC |
| Florida | FL |
| Georgia | GA |
| Guam | GU |
| Hawaii | HI |
| Idaho | ID |
| Illinois | IL |
| Indiana | IN |
| Iowa | IA |
| Kansas | KS |
| Kentucky | KY |
| Louisiana | LA |
| Maine | ME |
| Maryland | MD |
| Massachusetts | MA |
| Michigan | MI |

| Texas | TX |
| Utah | UT |
| Vermont | VT |
| Virginia | VA |
| Virgin Islands | VI |
| Washington | WA |
| West Virginia | WV |
| Wisconsin | WI |
| Wyoming | WY |

## Limitations of Data

The data in this report are comparable from school system to school system to the extent that they are collected on a standard form based on standard definitions. However, despite the increasing use of the standard terminology handbooks, great variety in recording and accounting methods still prevails among the States and local school systems. To assure maximum comparability the reports were rigorously edited. Where discrepancies were detected, every effort was made to secure a revised, more compatible report. Serious discrepancies or gaps in the data are indicated by footnotes in the tables.

Users of the data who are interested in making direct comparisons between individual school systems should be guided by the following considerations:

1. State education agencies and local school systems were encouraged to provide reasonable estimates where precise data were not available. Comparisons between individual school systems may be affected to the extent to which they involve such estimates.

2. There are instances in which a school system will compare unfavorably with another in terms of statistical indicators when it is actually a superior system. For example, school system A may have a notably higher pupil-teacher ratio than school system B. Without further investigation it may appear that system B is better staffed. Yet, a close look at the two systems may show that system A has a well-planned and well-coordinated program of large-group lectures and smaller regular classes, while system B uses only the traditional classroom system.

TABLES OF NATIONAL ESTIMATES

Table A.--Pupils in local public school systems, by enrollment size of school system, organizational level, and grade: United States, fall 1969

| Organizational level and grade | Total | Enrollment size of school system | | | | | |
|---|---|---|---|---|---|---|---|
| | | 25,000 or more | 10,000-24,999 | 5,000-9,999 | 2,500-4,999 | 300-2,499 | Under 300- |
| All levels..... | 45,521,776 | 13,475,792 | 8,098,168 | 7,643,252 | 7,185,434 | 8,509,353 | 609,777 |
| Elementary, total..... | 27,346,406 | 8,105,507 | 4,763,114 | 4,566,242 | 4,331,558 | 5,128,028 | 451,956 |
| Prekindergarten..... | 53,104 | 27,576 | 7,883 | 9,297 | 6,560 | 1,788 | 0 |
| Kindergarten..... | 2,480,580 | 807,357 | 463,988 | 387,599 | 385,557 | 413,805 | 22,273 |
| First grade..... | 3,875,310 | 1,154,248 | 682,049 | 653,542 | 607,412 | 716,384 | 61,676 |

BASIC DATA TABLES

SELECTED
LOCAL PUBLIC SCHOOL
SYSTEMS

Table 1.--Number of pupils and classroom teachers, and ratio of pupils to classroom teachers, by organizational level, in selected local public school systems: Fall 1969--The "enrollment" figures shown in the table represent the number of pupils on the active membership roster of the school system on or about October 1, 1969. The pupil-teacher ratios were obtained by dividing total enrollments by the full-time equivalents of classroom teachers given in table 3. For both pupils and teachers, nursery and kindergarten data were added to "other elementary" figures in the computation of the pupil-teacher ratio for elementary schools. Classification of organizational level was on the basis of State and local practice; however, pupils and teachers were reported on the same basis.

Column 2 contains the numerical codes that were assigned to the metropolitan-status categories: 1, metropolitan, central; 2, metropolitan, other; and 3, nonmetropolitan.

TABLE 1.--NUMBER OF PUPILS AND CLASSROOM TEACHERS, AND RATIO OF PUPILS TO CLASSROOM TEACHERS, BY ORGANIZATIONAL LEVEL, IN SELECTED LOCAL PUBLIC SCHOOL SYSTEMS: FALL 1969

* ESTIMATED BY OFFICE OF EDUCATION.

# ESTIMATED BY STATE OR LOCAL EDUCATION AGENCY.

Table 2.--Pupils in membership, by organizational level and grade, in selected local public school systems: Fall 1969--Membership represents the number on the active roster on or about October 1, 1969, or the earliest point in time that enrollment was considered to be stabilized. Classification by organizational level and grade is on the basis of State and local practice, with grades 7 and 8 in some systems listed as elementary and in others as secondary.

TABLE 2.--PUPILS IN MEMBERSHIP, BY ORGANIZATIONAL LEVEL AND GRADE,

Table 4.--Classroom teachers, by highest level of education completed, in selected local public school systems: Fall 1969 (full-time and part-time positions)--School systems were asked to report the classroom teachers on the same basis as they were reported in table 3, i.e., full-time equivalence. However, there is indication that some school systems deviated from this pattern by reporting in terms of total number of teachers, full-time and part-time. Others apparently included other instructional staff in addition to classroom teachers. Therefore, the total number of teachers reported in table 4 will not always agree exactly with the total shown in table 3.

TABLE 4.--CLASSROOM TEACHERS, BY HIGHEST LEVEL OF EDUCATION COMPLETED, IN SELECTED LOCAL PUBLIC SCHOOL SYSTEMS: FALL 1969

SAMPLE DESIGN AND SELECTION

RELATED DATA

REPRODUCTION OF SURVEY FORM
AND INSTRUCTIONS (OE FORM 2350)

## APPENDIX A

## SAMPLE DESIGN AND SELECTION

### Sample Design

The sample was designed to meet the following criteria:

1. Provide highly reliable national estimates.
2. Provide reasonably reliable estimates for each of the enrollment size strata.
3. Include all school systems with enrollments of 10,000 or more.
4. Include a stratum covering school systems with enrollments of under 300.

The variable "average daily membership," which was expected to be highly correlated with many other survey variables, was used as the design variable.1/ The number of sample school systems in any stratum was to be of sufficient size so that the expected coefficient of variation of the sample estimate of "average daily membership" for the stratum would not exceed 5 percent. After all the enrollment size group constraints listed above were satisfied, the supplemental sample required for national estimates was allocated among the strata in accordance with an optimum allocation for national estimates of total enrollment. This led to a total sample 1,667 school systems. The sampling fractions and other data pertinent to the sampling pla are shown in table i.

The sample was selected from the Office of Education's universe of some 18,600 operating local public school systems, as of fall 1969. All operating school systems were subdivided into the six strata based on enrollment size shown in table i. Enrollment size for this purpose was based on the number of pupils reported in the fall 1969 school system universe survey. In most cases this represented an average daily membership figure (ADM). All systems in the first two strata (10,000 enrollment or more) were included in the survey. For each of the remaining strata, a systematic random sample was chosen with the sampling fractions specified in table i.

---

1/ The sample for the present survey is the same as that used for the ELSEGIS survey of 1968-69 school system finances being released in the report, Statistics of Local Public School Systems, 1968-69, Finances. "Average daily membership" is a variable in the financial survey; "fall membership," used in the present survey, is a closely related pupil measure.

## Estimates of Totals

For estimating totals, the figures for each reporting school system were inflated by the reciprocal of the sampling rate in the stratum from which it was selected, adjusted for nonresponse. For estimates by "enrollment size," school systems were tabulated according to the reported fall membership.

## Sampling Reliability

Because the figures in this report are estimates derived from a sample, they are subject to sampling variability. As a guide to users of the data, approximate measures of the sampling reliability of the survey estimates are presented in tables ii and iii. These tables show the estimated coefficient of variation, a measure of sampling variability, for each specified survey variable. The chances are about 2 out of 3 that the percentage difference between an estimate and the figure that would have been obtained from a complete canvass of all school systems, using the same survey forms and procedures, would be less than the limit of error specified in the table. Similarly, the chances are about 19 out of 20 that the percentage difference would be less than twice the specified limit of error and about 99 out of 100 that it would be less than 2.5 times the specified limit.

The coefficient of variation does not reflect response biases or systematic errors incurred in the data handling processes such as would be applicable even if there were complete coverage of all school systems. However, concerted effort was made to minimize such errors through editing and followup procedures.

Table i.--Universe and sample

| Sampling stratum enrollment size | Universe 1/ | Sampling fraction (approximate) | Sample | | | Inflation factor 2/ |
|---|---|---|---|---|---|---|
| | | | Total | Respondents | Non-respondents | |
| Total U.S. | 17,980 | - | 1,645 | 1,621 | 24 | - |
| 25,000 and over | 180 | 1:1 | 180 | 180 | 0 | 1.00 |
| 10,000 - 24,999 | 538 | 1:1 | 538 | 529 | 9 | 1.02 |
| 5,000 - 9,999 | 1,096 | 1:5 | 206 | 204 | 2 | 5.37 |
| 2,500 - 4,999 | 2,026 | 1:10 | 213 | 211 | 2 | 9.60 |
| 300 - 2,499 | 7,911 | 1:30 | 267 | 261 | 6 | 30.31 |
| Under 300 | 6,229 | 1:26 | 241 | 236 | 5 | 26.39 |

1/ Represents the fall 1969 universe of school systems as published in Education Directory, 1969-70, Public School Systems, adjusted to cover the elimination of California county special schools from survey, discontinued school systems, and miscellaneous other adjustments.

2/ After adjustment for nonresponse.

2/ Data for the 25,000-and-over enrollment stratum are without sampling error. This stratum was selected at certainty and all systems responded.

## APPENDIX B

## RELATED DATA

In addition to this study, which is designed to collect data on individual school systems as well as to provide national estimates, NCES conducts three surveys from which national estimates of school personnel, pupils, or staff are collected.

The survey State Elementary and Secondary School Statistics consists of comprehensive State aggregate reports collected biennially. It includes data on public school organization, staff, pupils, and finances. Preliminary data from the 1967-68 biennial survey are shown in Preliminary Statistics of State School Systems, 1967-68; the final publication is in preparation. Data for 1969-70, the time period most closely corresponding to the present survey, are now being collected.

The survey Fall Report on Membership, Teachers, and Schoolhousing, popularly known as the "Fall Survey," is conducted each fall to obtain quick estimates of enrollment, number of teachers, schoolhousing statistics, and estimated expenditures for the current year. As with the biennial survey, data are collected by means of State aggregate reports.

A directory of local public school systems is prepared every year. Because data on the number of pupils, usually average daily member (ADM) for the previous year, are collected, summary data are tabulated. The directory whose data corresponds most closely to those of this report is Education Directory, 1970-71, Public School Systems.

Because of differences in purpose, coverage, and method of data collection, estimates in the present publication will differ from figures for the same or similar variables presented in the other OE publications. For example, the national estimate of fall 1969 membership in the present report is 45,521,776; the comparable figure from the fall survey is 45,618,578; the latter figure is regarded as the official OE estimate. The average daily membership (ADM) for the school year 1969-70 as reported in the 1970-71 school system directory is 45,037,667. This figure is not exactly comparable to the others because ADM is a different measure from fall membership. It is also less reliable because not all States report on the same basis.

## PART A - PUPILS AND STAFF: FALL 1969

### INTRODUCTION

With this report form, the U.S. Office of Education in cooperation with the Committee on Educational Data Systems *(CEDS)* of the Council of Chief State School Officers continues the Elementary-Secondary General Information Survey *(ELSEGIS)*.

The survey was designed to meet the data needs of educational planners at all levels of government and outside of government. Data from past surveys have been used extensively by the U.S. Department of Health, Education, and Welfare, the U.S. Department of Housing and Urban Development, the Urban Education Task Force and numerous educational research centers.

Data are being requested from a representative sample of the Nation's local public school systems. To those who participated in past ELSEGIS surveys, we thank you for your continued excellent response; to those participating for the first time, your cooperation in this important project is very much appreciated.

In completing the form, please follow the enclosed instructions very carefully.

# Instructions for Completing OE Form 2350

# ELEMENTARY-SECONDARY GENERAL INFORMATION SURVEY II, PART A

## GENERAL INSTRUCTIONS

Data should be reported as of October 1, 1969, or some other early fall 1969 date when the school system's operation can be considered stabilized.

Enter data into the applicable boxed areas, placing the entry to the far right and leaving any blank spaces on the left. DO NOT LEAVE ANY LINE BLANK. If there is no entry for a particular line, enter a zero (0) in the units position of the data field. If precise data are not available, please provide your best estimate of the entry for that variable, and enter "EST." in red in the margin of the form.

---

## SPECIFIC INSTRUCTIONS

### IDENTIFICATION DATA:

STATE CODE: Entered by the Office of Education

OE NUMBER: Entered by the Office of Education

STATE SCHOOL SYSTEM IDENTIFICATION NUMBER: For optional use by State Education Agency

### ITEM A. PUPILS IN MEMBERSHIP ON OR ABOUT OCTOBER 1, 1969, BY ORGANIZATIONAL LEVEL AND GRADE.

Enter the number of pupils in membership on or about October 1, 1969, or the nearest date thereto when membership can be considered stabilized. Classify 7th and 8th grade pupils as elementary or secondary on the basis of State and local practice.

NOTE: PUPILS SHOULD BE REPORTED ON THE BASIS OF THE SAME ORGANIZATIONAL LEVEL AS TEACHERS *(Item B)*.

Line 1. Include pupils in a beginning group or class organized to provide educational experiences for children during the year or years preceding the kindergarten. Such classes must be part of the school system's operation; they may be held in separately organized prekindergarten centers or in the regular elementary schools. Include pupils in Head Start or Follow Through programs operated directly by the school system; do not include pupils of programs operated by the school system in behalf of another agency or by the other agency itself.

Line 2. Include pupils in a class organized to provide educational experiences for children during the year immediately preceding the first grade. *(See also instructions for Line 1.)*

Lines 3-10. Include elementary school pupils enrolled in the specified grades 1-8.

Line 11. Include elementary school pupils enrolled in classes which are not organized on the basis of grade and have no standard grade designation, i.e., regular classes which have no grade designations and special classes for exceptional pupils which have no grade designations.

Lines 13-18. Include secondary school pupils enrolled in the specified grades 7-12.

Line 19. Include secondary school pupils enrolled in classes which are not organized on the basis of grade and have no standard grade designation. *(See also instructions for Line 11.)*

Line 20. Include pupils who after graduation from high school *(grade 12)*, are enrolled in a secondary school for additional school work.

### ITEM B. NUMBER OF SCHOOL STAFF, BY POSITION.

This item is designed to obtain data for the entire school system and should therefore include staff assigned to individual schools, as well as those working out of the central office. Enter the number of staff by position. Reporting should be in terms of FULL-TIME EQUIVALENCE, that is the amount of employed time required in a part-time position expressed in proportion to that required in a full-time position, with "1" representing one full-time position. It is derived by dividing the amount of employed time required in the part-time position by the amount of employed time required in a corresponding full-time position. Please report in accordance with the following instructions:

a. Include only filled positions; do not count vacant positions.

b. Count part-time equivalence. Full-time equivalence should be counted to the nearest tenth. Examples:

(1) A full-time teaching position is filled by two persons, each working a half day - count each at .5 *(or the position at 1.0).*

(2) A French teacher works only 2 hours each day in a school system with a 6-hour day - count at 2/6 or .3.

(3) A small school system shares an art teacher with 4 other systems. The teacher spends 1 day per week at each - count at 1/5 or .2.

c. A full-time staff member working at more than one position or level should be counted as part-time in each of the different positions. For example, a person who teaches 3 days a week and serves as guidance counselor for 2 days should be classed as .6 in the former position and .4 in the latter.

Line 1. Include the administrative heads of school, i.e., those to whom the major responsibility for the management and direction of the activities of the school has been delegated.

Line 2. Include staff members assisting the head of a school in management and direction of the school.

Line 3. Include staff members performing activities of leadership, guidance, and expertness in a field of specialization for the purpose of improving the performance of teachers and other staff members.

Lines 4-7. Report teachers on the basis of the same organizational level as pupils *(Item A).*

Line 4. Include staff members teaching prekindergarten classes operated by the school system.

Line 5. Include staff members teaching kindergarten classes operated by the school system.

Line 6. Include staff members teaching grades other than prekindergarten and kindergarten classified as elementary by State and local practice.

Line 7. Include staff members teaching grades classified as secondary by State and local practice. *(NOTE: Where a teacher is teaching at both elementary and secondary levels, prorate the assignments between the levels, i.e., report in full-time equivalence.)*

Line 9. Include staff members who teach through the mediums of television or radio, and teachers of the homebound.

Line 10. Include staff members responsible for organizing and managing school libraries.

Line 11. Include staff members responsible for advising pupils with regard to their abilities and aptitudes, educational and occupational opportunities, personal and social adjustments, etc.

Line 12. Include psychologists and psychometrists responsible for providing psychological services to pupils, including the administration and interpretation of psychological tests. DO NOT include here psychiatrists or psychiatric social workers. Such noninstructional professional staff should be reported in Line 19.

Line 13. Include staff members responsible for preparing, caring for, and making available to instructional programs, the equipment, materials, scripts, and other aids which assist teaching and learning through special appeal to the senses of sight and hearing, e.g., director of audiovisual services, film inspector, projectionist, scriptwriter, graphic artist, etc.

Line 15. Include staff members performing activities of a nonteaching nature which are NOT classified as professional educational, but which assist a teacher to perform professional educational teaching assignments *(Aides, Helpers, Assistants, etc.).*

Line 16. Include staff members working in the school library who perform activities which are NOT classified as professional. Such duties may include distributive functions for the loan of materials, and assistance with the organization and use of materials.

Line 17. Include secretaries and clerks assisting the professional staff reported in Lines 1-13 above. *(Exclude any reported in Lines 15 or 16.)*

Line 19. Include all professional staff members other than the professional instructional staff members listed in Lines 1-13 above. Report here the superintendent of schools; deputy, associate, and assistant superintendent of schools; school business officials; central office staff responsible for system wide administration of operation, and maintenance; attendance officers; social workers; doctors; nurses and other health officials, etc.

Line 20. Include such nonprofessional staff as janitors, maintenance men, cafeteria workers, bus drivers, and secretarial and clerical workers other than those reported above.

ITEM C. NUMBER OF PROFESSIONAL STAFF BY HIGHEST LEVEL OF EDUCATION COMPLETED. Report separately in the appropriate areas for classroom teachers *(see Item B, Lines 4-7)* and for other professional staff *(see Item B, Lines 1-3, 9-13, and 19).* However, in this item include all professional staff members, full-time and part-time; DO NOT report in full-time equivalence.

Report only on the basis of degrees actually completed or granted. For example, a staff member who has completed all course work towards a Master's degree, but who is still working on a thesis should be reported in the Bachelor's degree column.
